

THE PHARMACEUTICAL INDUSTRY IS ATTACKING FREEDOM OF RELIGION

SUPPORT YOUR NEIGHBORS! PROTECT THE FIRST AMENDMENT!

February 2019

TEN THESES

“Out of love and zeal for clarifying the truth*”, and the need to protect the sanctity of our religious beliefs, each religious community should discuss the following items prior to surrendering an important religious right to the Pharmaceutical Industry. The Pharmaceutical Industry currently seeks to remove religious freedom in multiple states.

Ten items which should be discussed before surrendering religious freedoms:

1. Production for some vaccines involves use of aborted fetal cells.
2. The vaccine manufacturing production involves the use material from other species (cows, pigs, chickens, monkeys, etc) creating the potential for contamination with the DNA of other species.
3. The 6th Commandment prohibits killing. Vaccines can kill. More than 600 vaccine deaths have been compensated under the Vaccine Injury Compensation Act. The potential connection between vaccination and SIDS has never been adequately studied.
4. The 5th Commandment instructs society to honor fathers and mothers. Substituting the beliefs of “the state” over the religious beliefs of parents dishonors them in violation of the 5th Commandment.
5. The 9th Commandment prohibits bearing false witness against your neighbors. Drug companies, public health officials, and the media routinely bear false witness by exaggerating the benefits of vaccination and minimizing the risks.
6. Vaccines as a product are legally classified as “unavoidably unsafe”. Vaccine manufacturers have liability protection BECAUSE their products are unavoidably unsafe. Yet the pharmaceutical industry and the government bear false witness, marketing vaccines as “safe and effective”.
7. Measles is not a “deadly” disease in the United States. No one has died in the US from measles since 2003. But pharmaceutical industry marketing campaigns create false media hysteria around “deadly” measles to scare legislators into taking away important religious freedom rights.
8. Evidence of vaccine safety is utterly lacking. CDC Whistleblower Dr William Thompson said five years ago that the culture of corruption at the CDC “set (vaccine safety) research 10 years behind.” In 2019, the false witness by the CDC has set safety research 15 years behind.
9. Vaccines cause regressive autism in an unknown number of children. Vaccines can also cause seizure disorders, MS, brain damage, and autoimmune and cardiac injuries. Omitting these risks bears false witness.
10. Mandatory vaccination violates the principles of The Universal Declaration on Bioethics and Human Rights which state that the individual takes priority over the state and that prior, free and informed consent are required before administering a vaccine. Drug companies bear false witness by omitting this information in the pursuit of increase sales.

*Martin Luther, 95 Theses (1517)

The First Amendment’s freedom of religion is sacred. We should not easily surrender our existing religious freedoms to the state. The word vaccine is from the Latin “vacca”, meaning cow. The infant and child drug (vaccine) program has been a sacred cow for too long.
